

Assessment Brief- Assessment 3- Final Report

Unit Code/Description	ICT308 – Capstone Project 2
Course/Subject	BIT
Semester	2026- S1
Unit Learning Outcomes Addressed	ULO 1, 2, 3 and 4
Assessment Objective	The aim of this assessment is to compile a comprehensive final report detailing all aspects of the completed Capstone Project 2. It captures the design, development, implementation, testing, and evaluation processes. This report serves as the final documentation and reflection on the project outcomes and learnings.
Assessment Title/Type	Final Report
Due Date	Report should be submitted online in Moodle by one member of the team ONLY (Group Leader) on Sunday Week 12, before 11:59PM.
Weighting	30 Marks
Instructions to Students	Check section Assessment Description
Format/Structure	The report must be a word document
Word/Page limit	3000 words report
Referencing Style	American Psychological Association (APA) Referencing Style
Submission Guidelines	Your name, student ID and group number must appear at the beginning of your report. This assessment must be submitted to Turnitin. Login to your Turnitin account, locate and click on the assignment submission link, carefully review the instructions, and then submit your assessment.
Plagiarism and Academic Integrity	At CIHE, we take academic integrity seriously and expect all students to maintain the highest standards of honesty and ethical behaviour in their academic work. As a student, it is your responsibility to ensure that all your academic endeavors are conducted with integrity and in accordance with the principles of honesty, fairness, and respect for intellectual property. Please refer to “CIHE Student Academic Integrity and Honesty Policy” in the Moodle for details.
Late Submission Policy	Requests for extensions will be granted only for exceptional circumstances that are supported by credible evidence. Duration of the extension period is only one week. Late submissions are subject to 10% reduction in marks for each day of delay. Submissions after the extended date will not be marked.
Academic Integrity and AI use Requirements	Students may use AI tools for: brainstorming report structure and section headings AI use must be acknowledged. All technical content must be student-produced, including system architecture, implementation details, testing results, evaluation, ethical analysis, and project outcomes.

ASSESSMENT DESCRIPTION:

The final report serves as a comprehensive document that consolidates all key aspects of the capstone project. This report should clearly present the final project requirements, the proposed design, and the planned implementation approach for effective project execution. It is expected to demonstrate a structured and strategic methodology that reflects the knowledge and skills acquired throughout the project lifecycle.

Students should ensure that their report provides a detailed analysis of the project, incorporating well-documented justifications for design and implementation decisions. The report should also reflect on challenges encountered and how they were addressed, as well as any key learnings from the project experience.

Cover Sheet Requirement

All groups must **download, complete, and attach the CIHE Assessment Cover Sheet from Moodle** when submitting this assessment.

The cover sheet includes:

- Team member details and contribution percentages
- Responsibilities for the project
- The Academic Integrity Declaration
- The AI/Tool Use Declaration Table

Submissions without the completed cover sheet are not accepted.

Use of AI Tools (GenAI)

Students may use AI tools for:
brainstorming report structure and section headings

AI use must be acknowledged.

All technical content must be student-produced, including system architecture, implementation details, testing results, evaluation, ethical analysis, and project outcomes.

The report should include the following sections:

Table of Contents

Abstract.....	ii
Acknowledgements.....	iii
Statement of Originality.....	iv
Table of Contents.....	v
List of Figures.....	vi
List of Tables.....	vii
Chapter 1 Introduction.....	1
Chapter 2 Literature Review.....	2
Chapter 3 Design and Implementation.....	7
Chapter 4 Evaluation and Results.....	8
Chapter 5 Conclusion.....	9
References.....	10

Chapter 1: Introduction

1.1 Project Overview: Summarize the project, including the initial problem or need, and provide context from Capstone Project 1.

1.2 Objectives for Capstone Project 2: Define the specific goals for this phase, focusing on the final development and integration of the system.

1.3 Scope: Clarify what is included in Capstone Project 2 and any limitations.

1.4 Report Structure: Brief overview of the contents of each chapter. For example:

Chapter 2: Literature Review

2.1 Overview of Existing Research/Technologies: Discuss existing work, research, and technologies related to your project.

2.2 Gaps in the Literature: Identify where current research or technology falls short, justifying the need for your project.

2.3 Theoretical Framework/Concepts: Any theories or concepts that underpin your project.

Chapter 3: Design and Implementation

3.1 Recap of Design and Requirements: Briefly revisit the key design decisions, software requirements, and UI design from Capstone Project 1.

3.2 Front-End Development: Discuss the implementation of the user interface, including tools, frameworks, and any challenges encountered.

3.3 Back-End Development: Detail the development of the back-end, including database integration, server-side logic, and APIs.

3.4 Integration and Testing: Describe how the front-end and back-end were integrated, including any testing strategies employed (unit tests, integration tests, etc.).

3.5 Ethical, Privacy, and Security Considerations: Explain how ethics, privacy, and security principles were applied during development, including any specific measures taken to protect user data and ensure fairness.

Chapter 4: Evaluation and Results

4.1 System Performance: Analyse the performance of the system against the objectives set in Capstone Project 1.

4.2 Acceptance and Useability Testing and Feedback: Present the results of any acceptance and useability testing, including feedback received and how it was addressed.

4.3 Comparison with Initial Design: Compare the final implementation with the initial design and requirements, discussing any changes or deviations.

Chapter 5: Conclusion

Highlight the key points of each of the previous chapters. Explain them into 2 pages.

Marking Rubric: 30 Marks

Criteria	Poor	Fair	Good	Very Good	Excellent
Introduction & Literature Review (Mark 6)	Unclear introduction; weak or irrelevant literature review.	Basic introduction: literature review is limited in scope or relevance.	Adequate introduction with a relevant literature review, though somewhat superficial.	Clear and well-structured introduction; comprehensive literature review.	Exceptionally clear and insightful introduction with a thorough and well-integrated literature review.
Development & Implementation (Mark 9)	Poor development; unclear implementation strategy; lacks coherence.	Basic development with limited implementation; some details are unclear.	Adequate development: implementation is generally clear with some minor gaps.	Well-developed and implemented; clear and logical progression.	Exceptionally detailed and coherent development; implementation is thorough and innovative.
Evaluation (Mark 6)	Insufficient testing; results are unclear or unsupported.	Basic testing with minimal detail; results are present but lack depth.	Adequate testing, results are clear but may need more thorough analysis.	Comprehensive testing with clear and detailed results.	Exceptionally thorough testing with insightful analysis and well-supported results
Ethics, Privacy, & Security (Mark 3)	Little to no consideration of ethics, privacy, or security.	Basic identification of ethical/security issues, with limited solutions	Good analysis of ethical/security issues with some solutions provided	Strong consideration and integration of ethics, privacy, and security into the project.	Exceptional attention to ethics, privacy, and security; deeply integrated and well-justified.
Results, Discussion & Conclusion (Mark 6)	Weak results; discussion lacks depth; conclusions are unsupported.	Basic results and discussion; conclusions may lack support or clarity.	Adequate results; discussion is clear, with supported conclusions.	Strong results and detailed discussion; well-supported conclusions.	Exceptional results with insightful discussion and well-justified, clear conclusions.
